

São Vitor High-Performance Cotton Natural Paper Round Wick |HP-CNP

The special high-Performance Cotton Natural Paper Wick wick by São Vitor is an innovative product manufactured with cellulose-based cotton and special rigid paper core to meet the challenging demands of today's complex candle formulations. While it exhibits all of the positive characteristics of other wicks, due to the proprietary materials used in its construction, the Cotton Natural Paper Wick (HP-CNP) is classified as a round-cored wick. Due to the capillary action, HP-CNP wicks maintain greater burn stability from beginning to end.

Wick Features:

Constructed from a cotton, cellulose based, rigid paper core. Designed to be used in scented candles.
Engineered to maintain greater burn stability from beginning to end.
